

AutoPilot M6-WMQ, VERSION 10.1.5 (6.7.3) E-FIX for Linux RHEL (x86\_64)

(C) Copyright Nastel Technologies, Inc. 2020

```
=====
Subject      : E-Fix 3 for Linux RHEL5 (x86_64)
Date         : 18-Dec-2020
File        : Nav_Components_10.1.5_Linux_Rhel_x86_64.tgz
Includes    : Nav_Components_10.1.5_Linux_Rhel_x86_64.txt  -- this readme
              bin                -- M6-WMQ binary files
              lib                -- M6-WMQ library files
              nsqrc.ini          -- M6-WMQ reason codes
              nsqsev.ini.ito     -- M6-WMQ Log Adadapter resource file
              nsqsev.ini.tivoli  -- M6-WMQ Log Adadapter resource file
```

IMPORTANT: This E-Fix MUST be applied to builds 6.6.0 of Navigator or later  
(6.6.x/6.7.x)

NOTE: Workgroup Server 6 (nsqmgr) updates are no longer supplied.

Prerequisites: Navigator 6.6.x or 6.7.x for Linux RHEL (x86\_64)

-----

INSTALLATION:

- 1) Stop all Nastel processes.
- 2) Back up the %APWMQ\_HOME% directory
- 3) Place Nav\_Components\_10.1.5\_Linux\_Rhel\_x86\_64.tgz in the installation directory (%APWMQ\_HOME%).
- 4) Extract contents 'here', under %APWMQ\_HOME% replacing existing content.
- 5) Restart Nastel processes (nsqmgr is no longer supported).

Fixes:

-----

APWMQ

-----

0015230: [WMQ Agent] Provide for starting/stopping queue managers in multiple  
Installation MQ environment

0021128: [Message Server] Message Server does not reconnect to multi-instance queue  
manager

0022521: [Workgroup Server] AS400 agent registration is not answered by workgroup server

0022975: [Command Utilities] nsqmqsc AUTHINFO commands are incomplete

0023002: [Command Utilities] nsqmqsc produces no object authority records if WGS  
Discovery option "include authority records" is not checked

0023138: [Connection Manager] unable to stop the nsqcmp process using the script or  
manually executing the nsqstop command

0023139: [WMQ Agent] Provide Nastel APWMQ agent support of RDQM HA/DR functionality

0023294: [Connection Manager] Temp. dyn NASTEL.EVENT queues created based on  
SYSTEM.DEFAULT.MODEL.QUEUE

0023306: [WMQ Agent] Suppress issuing stop queue manager command twice

0023367: [Command Utilities] nsqmqsc utility with -d -r options causes + sign and  
'REPLACE' to be appended as new lines after every object definition

0023422: [Workgroup Server] MQRC\_CHANNEL\_SSL\_ERROR event in nsqadp log adapter sometimes  
missing workgroup, node and hostname fields

0023540: [Connection Manager] CM must support connecting with alternate user

0023587: [Log Adapters] Add MQRC\_CHANNEL\_SSL\_ERROR as severity warning in nsqsev.ini.ito and .tivoli  
0023639: [WMQ Agent] Explr Create Queue manager command causes Linux agent call to mqmcrt script and error msg AMQ7027  
0023647: [Common Engine] PCF param Id's missing in agent trace of multi-instance qmgr monitoring  
0023667: [Common Engine] Allow for WGS names that contain hyphen/minus in them  
0023811: [Connection Manager] Add support for multiple threads  
0023981: [WMQ Agent] MQ Agent nsqmq 6.7.2.3 will not start a standby instance of a queue manager
