

# Nastel AutoPilot for WebSphere Business Integrator (WBI)

## Monitor and Manage everthing

### About Nastel AutoPilot for WebSphere Business Integrator (WBI)

**Nastel AutoPilot for WebSphere Business Integrator (WBI)** lets you see exactly what is going on end-to-end in real time; From your newest web-based applications to your mainframe based legacy systems.

Nastel AutoPilot for WebSphere Business Integrator (WBI) incorporates some of the most advanced management and monitoring technologies such as a next generation metrics-collaboration scheme, on-demand event generation, user-definable events and action triggers, automatic data correlation, and compound alerting.

Nastel AutoPilot for WebSphere Business Integrator (WBI) lets you see exactly what is going on end-to-end in real time - from your newest web-based applications to your mainframe based legacy systems.

Nastel AutoPilot for WebSphere Business Integrator (WBI) provides you with standardized operational commands and control of your entire distributed WebSphere Business

Integration network from one single, Web- based console for all WBI services and components, including WebSphere MQ.

More than that, Nastel AutoPilot for WebSphere Business Integrator (WBI) is the only suite of tools that not only lets your IT staff see what's happening at the most granular levels, but also enables business users to detect, interpret, and make sense of the myriad of interactions and inter-dependencies and the complex events that keep your business processes flowing.

Nastel AutoPilot for WebSphere Business Integrator (WBI) gives you the power to make better, more timely decisions and take corrective actions before your business is impacted.

### Features and Benefits:

Feature	Benefit	Description
High availability	Improved service levels	Dramatically improves your service levels, customer experience and retention by maximizing the efficiency, availability and reliability of your WebSphere Business Integration applications.
Complete, secure control	Increased control	Gives you total end-to-end control across all platforms throughout your entire WebSphere Business Integration application environment

Feature	Benefit	Description
Empowerment across the enterprise	Reduce MTTR	Gives all groups affected by WebSphere MQ failures, including data center staff, support, application developers and business unit personnel the ability to take proactive corrective actions based on actionable alerts customized with the precise data they need about the impact of specific IT failures
Increased IT productivity	Efficiency improvements	Frees technical resources to focus on reducing application backlog, tightening security and addressing other pressing IT issues
Significantly reduced cost	Efficiency improvements	Automates labor intensive monitoring and management tasks and automatically corrects common failures and problems, allowing you to accomplish more with existing resources
Seamless implementation	Better utilization of existing resources	Plugs into popular ESM systems like HP-OV, Tivoli, Unicenter, and BMC Patrol to remove the need for expensive, time-consuming customization
Speed	Improve time to value	Accelerates the deployment of middleware technologies and WebSphere Business Integration applications
Minimal downtime	Meet SLA's	Virtually eliminates the process bottlenecks, performance degradation and downtime that can cost companies millions

Nastel's AutoPilot for WebSphere Business Integration Plug-in (Nastel AutoPilot for WebSphere Business Integrator) helps you realize the true benefits of this comprehensive end-to-end integration.

IBM's WebSphere Business Integration suite enables the tight integration of data, applications, processes and people across and beyond your company.
